

SEO AUDIT REPORT

Home2 Rebrand - bolderelectric.com

Date: July 11, 2026
Focus: Local Search Optimization & CTR Improvement

EXECUTIVE SUMMARY

Your new Home2 rebrand has excellent design and positioning for enterprise/critical power clients, but it's **severely damaging your local SEO rankings**. Google Search Console shows you're getting impressions for local searches ("electrician menifee," "emergency electrical services") but **0% click-through rates** because your page titles and content don't match what local customers are searching for.

Impact: You're stuck at position ~16 on average instead of position 5-10, and potential customers aren't clicking through even when Google shows your page. Fixing these issues can increase CTR from 0% to 3-5% within 2-4 weeks.

CURRENT PERFORMANCE (Google Search Console)

Query	Impressions	Clicks	CTR	Avg Position
electrician menifee	12	0	0%	30.33
emergency electrical services menifee	4	0	0%	18.75
professional electrical services menifee	2	0	0%	16
commercial electrical services menifee ca	2	0	0%	16.5
Emergency electrician menifee	2	0	0%	11
Home Page (generic)	93	3	3.23%	12.8

Key Insight: You're getting 12+ impressions for "electrician menifee" every month but **zero clicks** because your page title doesn't mention Menifee. People are seeing your page but not clicking.

■ CRITICAL ISSUES (Fix These First)

1. Page Title & Meta Description Don't Include Location Keywords

Current:
Title: "Bolder Electric | Critical Power & Electrical Infrastructure"
Description: "Bolder Electric delivers reliable critical power and electrical infrastructure solutions across Southern California."

Problem: When someone searches for "electrician menifee," Google shows your page but the title/description don't mention Menifee or match their search intent. Result: 0% click-through rate.

Recommended Change:

Title: "Licensed Electrician in Menifee, Murrieta & Riverside County | Bolder Electric"

Description: "Licensed electrician serving Menifee, Murrieta, Temecula, and Riverside County. Commercial, residential, emergency, and panel services. 24/7 response. Free quotes."

2. H1 Heading Doesn't Include Location

Current: H1 split into "Electrical" + "Infrastructure" (styled for appearance, not SEO)

Problem: Search engines use H1 to understand page content. Without location keywords in H1, Google doesn't know this is a local service page.

Recommended Change:

Change primary H1 to: "Licensed Electrician in Menifee, Murrieta & Riverside County"

Keep "Critical Power & Electrical Infrastructure" as an H2 subheading for your brand story.

3. Hero Copy Misses Local Messaging

Current: "Bolder Electric delivers reliable electrical solutions for the most demanding facilities throughout Southern California."

Problem: This doesn't mention emergency services, residential work, or the specific cities where you operate. People searching for "24/7 electrician menifee" won't see themselves in this messaging.

Recommended Change: Add after headline:

"24/7 Emergency Electrician Serving Menifee, Murrieta, Temecula & Riverside County. Residential • Commercial • Emergency Services • Panel Upgrades."

■ MAJOR ISSUES (Do Next)

4. Service Areas Section is Buried Below the Fold

Search engines give more weight to content near the top of the page. Your "Cities We Serve" section with Menifee, Murrieta, Temecula is way down the page (after Services, About, Team sections).

Fix: Move location information to hero section or right after hero. At minimum, add a one-line mention: "Serving Menifee, Murrieta, Temecula, and 100+ Southern California cities."

5. Services Don't Match Search Intent

Search Console shows people looking for: • "emergency electrical services menifee" • "professional electrical services menifee" • "commercial electrical services menifee"

Your Home2 services focus on: • Commercial & Industrial ✓ • Generator & ATS (too technical) • **UPS & Power Protection** (too enterprise-focused) • Lighting & Infrastructure • Residential (buried last)

Fix: Reorganize services section heading to be location + service focused:
Change to: "Professional Electrical Services in Menifee, Murrieta & Riverside County"

6. Missing Local Business Schema Markup

Google uses schema markup to understand your business type, location, and service area. Without LocalBusiness schema, Google might not properly connect your page to location searches.

Fix: Add LocalBusiness JSON-LD schema to page <head> with your service area cities listed (Menifee, Murrieta, Temecula, etc.)

7. No FAQ Section for Local Searches

An FAQ section answering questions like "Do you serve Menifee?" or "What areas do you cover?" would capture local search traffic.

Expected benefit: 5-10% additional organic traffic from local questions.

■ IMPLEMENTATION CHECKLIST

PRIORITY	TASK	IMPACT	TIME
P1	Update page title tag to include location keywords	■ High	5 min
P1	Update meta description to mention cities & services	■ High	5 min
P1	Change H1 to include location in main heading	■ High	10 min
P1	Add location keywords to hero copy	■ High	10 min
P1	Add LocalBusiness schema markup	■ Medium	20 min
P2	Add service areas callout to hero section	■ Medium	15 min
P2	Update services section H2 to mention location	■ Medium	5 min
P2	Add FAQ section with local keywords	■ Medium	30 min
P3	Create location-specific landing pages (/electrician/menifee, etc.)	■ Medium	2-3 hours
P3	Add local testimonials by city	■ High	1-2 hours

P1 (Priority 1): Do immediately - these directly affect search visibility and CTR

P2 (Priority 2): Do this week - improves rankings

P3 (Priority 3): Do in next 2-3 weeks - longer-term SEO investment

■ EXPECTED IMPACT (After Implementation)

METRIC	CURRENT	EXPECTED (30 days)	IMPROVEMENT
Avg. Position	16	5-10	↑ 6-11 positions
CTR on Local Searches	0%	3-5%	↑ 300-500%
Monthly Clicks	~5	~30-50	↑ 6-10x
Top Page Ranking for 'electrician menifee'	No	Yes (P1-P3)	New traffic

■ RECOMMENDATIONS

1. Balance Brand & Local SEO

Your rebrand is excellent for enterprise positioning, but you need to keep local search optimization front and center. The solution isn't to abandon "Critical Power Infrastructure"—it's to add location keywords and local messaging alongside it.

Think: "Bolder Electric: Critical Power Expertise. Local Service in Menifee & Riverside County."

2. Prioritize P1 Tasks This Week

Title tag, meta description, H1, and hero copy changes take 30 minutes total but will immediately improve CTR on your existing search impressions. You're leaving free clicks on the table.

3. Create City-Specific Landing Pages

Long-term, create /electrician/menifee, /electrician/murrieta, etc. with unique content. This is the #1 strategy for dominating local search in multiple cities.

4. Monitor Search Console Weekly

Watch your Click-Through Rate (CTR) improve week-over-week as you implement these changes. Track which keywords start clicking (they should go from 0% to 3-5%).

For detailed code changes and exact implementation steps, please refer to the accompanying technical audit document.
